ECR 7900 ELECTRONIC CASH REGISTER

The Olivetti ECR 7900 professional cash register features an innovative 8-line graphical operator display to visualize full details about each sale transaction and simplify system programming.

With its flexible hardware configuration, this model offers superior operating versatility. For example, the robust and roomy metallic drawer can be separated from the machine for maximum operator comfort.

A slot is provided for an SD memory card to boost the storage capacity of the electronic journal and simplify back-up of configuration parameters, which can then be implemented on other machines.

The Olivetti ECR 7900 also comes with a USB interface to connect a PC for programming and downloading reports, and an RS 232 interface to connect a barcode scanner for faster registration.

Software performance is equally impressive: up to 3000 PLUs, 99 departments and 10 department groups, 9 methods of payment, 15 clerk ID codes. Meanwhile, support for five different scrolling courtesy messages and stylish design make for a pleasant relationship between customer and operator.
